Profile

AI/ML-focused Computer Science undergraduate with hands-on experience in machine learning, cloud computing, and full-stack development. Proven ability to build scalable applications using Python, AWS, and modern web technologies. Passionate about solving real-world problems through data-driven systems and intelligent automation.

Core Skills

Languages	Python, Java, SQL
AI/ML	Scikit-learn, Supervised Learning, Model Evaluation, Data Preprocessing
Web	React, HTML, CSS, JavaScript, REST APIs
Cloud	AWS (Lambda, S3, DynamoDB, API Gateway)
Tools	Git, GitHub, Jupyter Notebook, Netlify, Vercel
Concepts	Data Structures, OOP, API Integration, System Design Basics

Education

GITAM University	2023–2027
B.Tech – Computer Science and Engineering (AI/ML)	

Experience

AI/ML Intern – Bharatversity (BITS Pilani Collaboration)	Jun–Jul 2025
- Built and trained machine learning models using Python and Scikit-learn on real-world datasets. - Performed data preprocessing, feature engineering, and model evaluation. - Applied ML techniques to solve practical problems during a 7-week intensive program.	
Cloud Computing Intern (AWS) – Axcentra	Nov–Dec 2025
- Developed a serverless full-stack Todo application using AWS Lambda, API Gateway, DynamoDB, and S3. - Designed REST APIs and implemented scalable cloud architecture. - Deployed a production-ready application with real-time data handling.	
Cybersecurity Intern – AICTE VOIS Program (Edunet Foundation)	Dec 2025–Jan 2026
- Explored cybersecurity concepts integrated with Generative AI tools. - Conducted packet analysis and security experiments. - Built a Python-based keylogger for understanding system vulnerabilities (educational purpose).	
Web Development Intern – The Developers Arena	Jan 2026
- Built responsive web applications using HTML, CSS, and JavaScript. - Focused on UI/UX optimization and performance improvements. - Delivered functional web projects within a 1-month internship cycle.	

Projects

Diamond Price Predictor	Python, Scikit-learn, Flask
- Built a machine learning model using Random Forest to predict diamond prices. - Developed a full-stack web interface using Flask and JavaScript. - Improved prediction accuracy using feature engineering and evaluation metrics (RMSE, R2).	
Blood Alert System	React, Firebase
- Developed a real-time blood donation platform with notification system. - Implemented role-based authentication and Firestore database integration. - Enabled instant alerts using Firebase Cloud Messaging.	
NCC Recruitment Website	HTML, CSS, JavaScript
- Designed and deployed a responsive recruitment website on Netlify. - Integrated features like countdown timer, gallery, and QR-based registration.	

Achievements

- GATE Qualified – Computer Science and Information Technology (CS)

Certifications

- IBM Computer Networks Certification
- OpenAI Prompt Engineering Certification
- Microsoft Project Management Certification
- Google Data Analytics Certification

Activities

- Served in the National Cadet Corps (NCC) as Sergeant from 2023–2026, leading cadet activities and training programs.
- Developed leadership, discipline, teamwork, and communication skills through NCC camps and organizational activities.
- Actively participate in technical projects and internship programs.
- Strong interest in AI systems, cloud architecture, and full-stack development.

Languages

English, Telugu, Hindi
